

Change of Ticket System for DeepSec and DeepINTEL

Posted on **January 31,2018** by lynx

We have made some changes behind the scenes, as always when preparing the new events for the year. This time we decided to change the ticket shop for both DeepINTEL and DeepSec. The reason for the new shop is its focus on privacy and security. Most shops are part of a social media network or collect too much information (can be both, depends on the interaction and the platform). It doesn't matter if the collected information is being protected by privacy procedures or not. Our intent was to streamline the process. For you this means that you can buy your tickets as easy as before. We still have vouchers, too. Ask our sponsors. Furthermore the payment is done directly to us, so we can manage your visit to DeepSec and DeepINTEL more efficiently. Also the new shop offers some more payment methods.

In case you need anything, have special requests, or need support with [buying tickets](#) via the [ticket shops](#), then [please let us know](#). Keep in mind that we still offer different rates. The earlier you book, the less money you spend!
